

# Team

On the scientific & mathematics, both [Luc Hazoumé](#) & [David Senouf](#) are proven Mathematicians & Data Scientists, as well as accomplished developers.

On the cloud platforms, the rest of the team, [Nicolas Romanetti](#), [Jean-Louis Boudart](#) & [Florent Ramière](#), are the experienced architecture, infrastructure & Open Source developers.

We are experts with the entire array of various [cloud hosting](#) and infrastructure tools provided by Google. Please also read the following [case study](#).

---

David Senouf

Project Lead / Mathematician / Data Scientist

Ph.D in Mathematics from UCLA in 1994, former Internet Startup co-founder in France, today Data Scientist & Open Source advocate. Extensive experience in Financial markets. Interested in various industrial applications of mathematical modelling & numerical computations. Focus on data science & business efficiency via usage of cloud based collaborative environments such as Google Cloud Platform, Google Apps, esp. Google Sheets & Javascript. Geometric Abstract painter, surfer & snowboarder. For more details, please go to <http://sentai.eu/about/team/davidsenouf/>

Scientist

Role

---

Florent Ramière

Java Hoplite

For 20 years Florent Ramière has been developing complex to build, easy to use software. He likes to be an architect but also a developer or a coach. Coding is his passion. Understanding what the users want is for him a fun game. What matters to him is getting ambitious things done in a

challenging technical and human environment. When he is not in front of a computer he likes to runs and go for long rides with his mountain bike. For more details, please go to <http://sentai.eu/about/team/florentramiere/>

DevOps and Computing Optimization  
Role

---

Jean-Louis Boudart

DevOps / Open Source Addict

Jean Louis Boudart is an independent consultant focused on Java/JEE technologies. Deep involvement in open source community (Project lead on EasyAnt project : <http://www.easyant.org>, Jenkins commiter ). He is particularly interested in subjects related to software quality improvement (build automation, dependency management, continuous integration, quality audit, ...) and devops. For more details, please go to <http://sentai.eu/about/team/jeanlouisboudart/>

DevOps and Infrastructure Guru  
Role

---

Nicolas Romanetti

Nicolas Romanetti is an experienced Software Engineer with scientific background. He has worked for 5 years in the USA prior to founding Jaxio and creating Celerio, a code generation Software that has been used by the French Central Bank to rewrite key business applications. Nicolas is able to find creative and innovative solutions to complex problems. He is obsessed by quality and always longs for simple and elegant software solutions. Nicolas holds an Engineering Diploma from Telecom Paris Tech, one of the leading Grandes Ecoles in France and a Master 1 of Fundamental Physics from UPMC Paris 6. For more details, please go to <http://sentai.eu/about/team/nicolasromanetti/>

Developer and Java Guru  
Role

---

Luc Hazoumé

Financial Engineer, Mathematician, Data Scientist, Developer  
.NET / C# / Azure / Neural Networks Guru. Applied Mathematics  
& Computing (stochastic processes, optimization, programming  
etc...). Mathematical Finance (Quant IT / Structurer /  
Strategist / Algo trading). Neural Networks, Machine Learning,  
Big Data, Cloud Computing (Azure). Problem solving, Curious,  
Scientifically challenging. Modelling & Pricing (Finance),  
Software Development (.NET / C# / Azure / SQL Server).  
Statistics / Machine learning / Data Science / Neural Networks  
/ Machine Learning Rugby, Running (+/- triathlon) For more  
details, please go to <http://sentai.eu/about/team/luchazoume/>

Data Scientist and .Net engineer

Data Scientist
