

# Jean-Louis Boudart

Jean Louis Boudart is an independent consultant focused on Java/JEE technologies and a serious [devops](#) ! He has been developing, building architecture, coaching developers, assisting customers to build robust and ready to use applications in a very agile way.

As an Open Source addict, he is deeply involved in the open source community, having participated in (or lead in the case of EasyAnt) the following projects:

- [Apache Ant](#) PMC
- Project lead on [EasyAnt project](#)
- [Jenkins](#) commiter !
- [Celerio](#)
- [Highway to urhell](#)

He is particularly interested in subjects related to software quality improvement (build automation, continuous integration, quality audit), [devops](#) and internet of things.

Technical knowledge :

- Programming language : Java/JEE, Python, Javascript/CoffeeScript, C/C++, Delphi, PHP, HTML / XML / XSL, Shell, Perl
