

Consulting

BIG DATA – DATA SCIENCE – INFRASTRUCTURE

Open Source, Cloud, Big Data & Data Science
Consulting

Cloud Computing, Web and Mobile Application Development

Introduction

is a Paris based Software consulting, Data Science and Open Source development group bringing together multiple talents from the IT, Finance & Scientific world.

Consulting and Development

With a strong team of data scientists, open source and .Net developers, devops, system architects, A.I. & Big Data specialists, we offer consulting & development services:

- Open Source & .NET technologies
- Cloud Infrastructure (Automation, Scalability, Management): we partner with Google Cloud Platform, to leverage unique and state of the art infrastructure and platforms
- Big Data
- Data Science (A.I, Machine Learning, Neural Networks)
- Scientific (Mathematics, Statistics, Modelling)
- Web based platforms and mobile applications

Industry Specialization

With extensive experience in the Banking Industry, we specialise in Banking and Finance projects:

- Develop, Rewrite and Migrate a legacy system (read the Canaccord Quest Legacy Migration case study)
- Algorithmic Trading
- Trading Platforms

Customer Focus and Efficiency

We are a highly efficient and agile team of scientists & developers.

Customer focus is at the top of our priorities: we work very closely with your internal IT and Business Analysts to bring about the best possible solution matching your needs.
