

Web Platforms and Mobile Apps

We develop web platforms and mobile apps (iOS, Android) for your cloud computing projects !

We use the latest Web 2.0 technologies:

- [REST](#) (read the tutorial on [RESTful Web Services](#)),
- [Bootstrap](#),
- [AngularJS](#), [ReactJS](#), [VueJS](#)
- [CoffeeScript](#), [NativeScript](#), [TypeScript](#), Javascript
- [React Native](#) (mobile framework)

Below is a sample web app we developed for a financial cloud computing web application. See the [Quest case study](#) for more details:
